

Sussex Partnership
NHS Foundation Trust

A member of:
Association of UK University Hospitals

Our vision & mission:
(what we want to achieve)

Vision:

To improve the quality of life for the communities we serve.

Mission:

To lead the integration of NHS health and care and champion the rights of people with mental health problems and learning disabilities.

Delivery

(what our vision and mission mean in practice)

People feel valued, supported and cared for

Prevention of ill health through timely intervention and focusing on wellbeing

Partnerships that give people the care they need to help them thrive

Outcomes

(what difference this will make to people)

We will:

- › improve **patient, family and carer experience**, participation in their care and access to services (particularly crisis care)
- › improve **staff experience and wellbeing**, which includes making sure they are part of a team with clear objectives and have access to regular development
- › develop our **workforce** to meet the needs of our communities

We will:

- › help protect **children and young people** against later adversity and mental ill health
- › target our use of resources as a health and social care system to **get help to people earlier and integrate physical and emotional wellbeing**
- › work with our communities on **suicide prevention**

We will:

- › ensure people who use our services and their families are treated as equal partners with staff (through the **Triangle of Care** initiative) in planning and providing care
- › play a leading role in bringing together the provision of **health, housing, social care, employment and education** to give people more rounded support
- › **work with our commissioners** to improve the way services are planned, commissioned, designed and provided

Supported by:

- › Our **culture, values and behaviour** particularly in relation to how we promote compassion, inclusion, innovation and learning
- › **Effective and efficient use of resources** including the use of ground breaking research to develop our workforce and introduce new treatments
