

Evoke and Evoke+

What is the study about?

evoke is a 3-year study looking at the effect and safety of a daily tablet called Semaglutide which is already used by people to help control type 2 diabetes. The **evoke** study will examine the effects of Semaglutide on the change in cognition and function in people with early Alzheimer's disease.

Who is running the study?

The study sponsor is Novo Nordisk and it is being run by Professor Tabet and the team at the Dementia Research Unit.

Why is the study being run?

The purpose of the evoke studies is to find out whether the medicine, Semaglutide, has a positive effect on early Alzheimer's disease.

Why should you take part?

By taking part in **evoke**, you could be part of an international community of around 1840 people in approximately 40 countries around the world. It is expected that about 30 participants will be from the United Kingdom. Participation in clinical studies is entirely voluntary.

What will taking part involve?

The study will be explained fully to you and your partner, it includes:

- Taking one tablet every day
- Memory tests and questionnaires on how well you manage daily routines
- Blood samples
- 1 brain MRI scan to look at brain structure *
- 1 PET brain scan to test for amyloid (a protein involved in Alzheimer's disease) *

* You will have the opportunity to discuss the results of these scans with your study doctor before taking any medication.

Who can take part?

You may be able to take part if you are:

- Aged 55-85
- Have a diagnosis of Mild cognitive impairment or mild dementia due to Alzheimer's disease
- Have a study partner who is willing to take part in the study with you

How can I take part?

If you would like to hear more about the study please leave a message on our voicemail with your name and telephone number giving the reference '*Evoke study*'.

We will give you a call back and tell you more about the study and can arrange to send you some written information. Alternatively, you can email or write to us using the details below:
