

Dementia research changes lives!

Are you interested in research?

The Dementia Research Unit (DRU) is dedicated to improving treatment of Alzheimer's disease and other types of dementia by carrying out world-class clinical trials. You can get involved by volunteering to take part.

If you would like to speak to one of our doctors or research nurses about how you can participate in our clinical research studies, or if you want to find out more about our current research, please get in touch.
