

Learning Disability and Autism

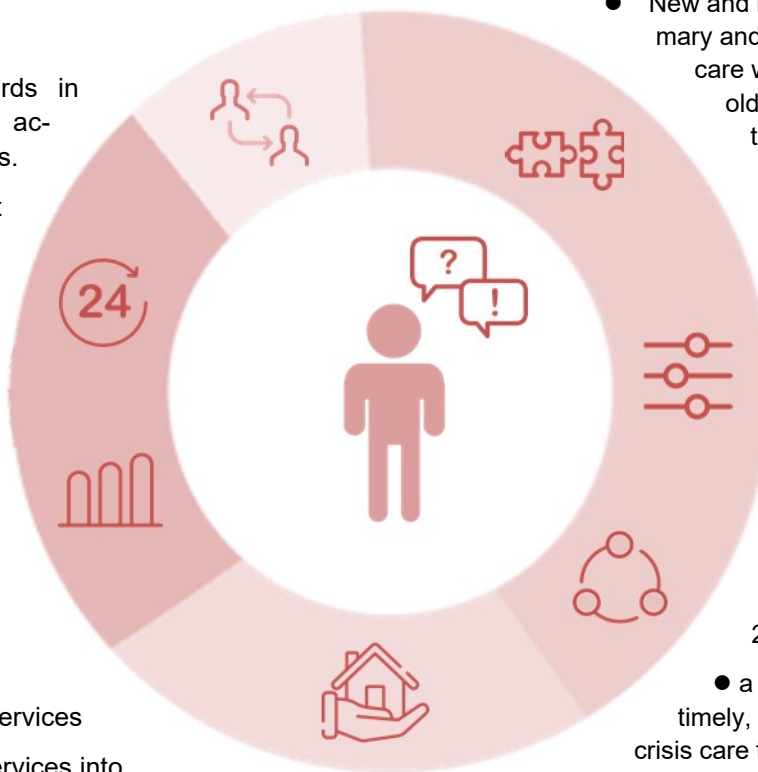

- Improving access to physical health checks including dental
- Reducing over medication
- Increasing overall standards in awareness creating more access to reasonable adjustments.
- Improving overall support with our Sustainability and transformation partnerships reduce waiting times for specialist services
- Assignment of key workers for multi-vulnerability an adopted children.

Improving access for Children and young people

- More access to community services
- Embedding Mental Health services into schools we will introduce School and college based MH Support teams with more welfare services
- We want 100% of those young people that need services to be able to access it.
- Expansion of age appropriate crisis services
- Extra capacity for early intervention
- New services to be developed for Complex trauma and serious sexual assault
- New Training and information for LGBTQ and those in care More focus on Suicide preventions for younger people

Improving Mental Health and Care

- Expanding IAPT services
- New and integrated models of primary and community mental health care will support adults and older adults with severe mental illnesses with personalised and Trauma Informed care
 - expand services for people experiencing a mental health crisis.
 - The NHS will ensure that a 24/7 community-based mental health crisis response for adults and older adults is available across England by 2020/21.
 - a single point of access and timely, universal mental health crisis care for everyone
- increase alternative forms of provision for those in crisis. Sanctuaries, safe havens and crisis cafes provide a more suitable alternative to A&E
- crisis houses and acute day care services, host families and clinical decision units
- everyone who needs it can expect to receive timely care in the most appropriate setting, whether that is through NHS 111, accessing a liaison mental health service in A&E, or a community-based crisis service
- Purposeful, patient-orientated and recovery-focused care is the goal from the outset
- Suicide bereavement support for families and staff working in mental health crisis services in every area of the country
- We will use decision-support tools and machine learning to augment our ability to deliver personalised care and predict future behaviour, such as risk of self-harm or suicide.

Milestones

- New and integrated models of primary and community mental health care
 - 380,000 more people per year will be able to access IAPT services.
